Front-end developer

Hi, I'm Oleksandra, an enthusiastic junior front-end developer dedicated to learning, growing, and contributing to innovative web projects. With foundational knowledge in HTML, CSS, and JavaScript, I'm continually expanding my skills to stay at the forefront of modern front-end development.

📖 Project Experience

LLOYD JEFFERSON Github Link
{HTML5, CSS3, JavaScript, Node.js, GIT}
Description: Team project. This is a developer portfolio with a responsive layout, modal windows and attractive design. **Role:** Developer.

watchcharm Github Link
{HTML5, CSS3, Node.js, GIT}
Description: Team project. This is the site of a company that sells watches, and it is completely customer-oriented, so the site is adaptive and easy to use. **Role:** Developer.

WEBSTUDIO Github Link
{HTML5, CSS3, GIT}
Description: This is the website of a company that develops websites and helps customers sell their goods and services better. **Individual project.**

Phonebook Github Link
{React Hooks, React.js, Redux.js, Web Applications, Parcel}
Description: This was an individual project where I developed a dynamic phonebook application using React. **Individual project.**
